

# On-site COVID-19 Testing

*East Rochester Union Free School District*

## Who will be tested?

- ✓ 20% of the district's in-person students and staff will be tested each month.
- ✓ Parents must submit a consent form for each student in their household. Only students we have received consent for will be tested. Students who do not test can remain in the hybrid model.
- ✓ All testing would be random for both students and staff.
- ✓ ERUFSD will test approximately 50 people each week. When staff and students who have given consent to testing are accounted for, testing will be approximately once every 16 - 18 weeks.

# Testing Process:

- ✓ Children will simply be called by class to a privacy screened area outside their classroom.
- ✓ The use of the privacy screen in the hallways will assist in minimizing the time spent outside of the classroom.
- ✓ In school testing will be conducted by trained staff members
- ✓ The test is a non-invasive lower nasal cavity swab that is done on both nostrils.
- ✓ Test results are determined within fifteen minutes of the test being conducted.

# Test Results:

- ✓ Individuals with negative results will return to what they were doing prior to the test.
- ✓ Individuals with positive results will follow guidance from the district's medical director and Dr. Mendoza.
- ✓ All test results will be sent to the New York State Department of Health, and the test kits will be returned to the vendor.
